

CAREER OBJECTIVES

- I am looking for an opportunity in a reputed organization which will help me deliver my best and upgrade my skills in engineering and meet the demands of the organization.
- To utilize my technical skills for achieving the target and developing the best performance in the organization. I would like to implement my innovative ideas, skills and creativity for accomplishing the projects.
- To obtain a challenging position in a high quality engineering environment where my resourceful experience and academic skills will add value to organizational operations.
- To be placed in a company in which I can use my technical skills and leadership qualities to the upliftment of the company and personal growth.
- Position as an engineer or related position which offers key participation, team oriented tasks, immediate challenges, and career opportunity.
- Dedicate, energetic and motivated team player seeking a career that would enable me to utilize into the (name) field.
- Engineering student with excellent communication and interpersonal skills with GPA of 4.0. Seeking for a Mechanical Engineering Student position with Honda, to apply and improve on honed skills. Coming with strong PC skills and CAD Design experience.
- Hardworking individual with team work abilities and proficient in Microsoft Excel and PowerPoint. Desirous of the Electrical Design – Electrical Engineering Student position with Tecfill Inc. Bringing CAD design abilities and solid mathematical skills to provide support for Design Engineers.
- Exceptionally numerate engineering student with strong data analysis skills. Seeking to apply electrical background and improve on skills in an Electrical Research – Electrical Engineering student position in a fast growing and dynamic firm.
- Energetic individual capable of innovative thinking in a team environment. Seeking for the position of a Civil Engineering Student position with Startec Inc., coming with general engineering knowledge.
- Architectural engineering student with excellent communication skills and experience in computer applications for engineering design programs. To obtain Engineering Student position with CanonDesign where huge knowledge of building systems engineering will be applied.

- Self motivated computer engineering student with teamwork abilities and great communication skills. Interested in an Engineering Student position with CBC, coming with solid knowledge of digital logic, analog circuits and its hardware implementations.
- Manufacturing engineering student with 4.0 GPA and strong communications and PC skills. Seeking for the position of Manufacturing Vocational Engineering at MMM Tech, to aid vocational project teams with manufacturing engineering support. Bringing 3D modeling experience in CREO/ProE.
- Individual with demonstrated leadership and teamwork abilities, desirous of GE-Aviation Engineering Intern position at Buck Resources. Coming with strong materials engineering background, analytical and problem solving approach, and strong knowledge of computer and Microsoft products.
- Individual with proven interpersonal skills and excellent oral and written communication skills. Interested in the position of a Water Resources Engineering Student position with RESPEC Inc., to utilize exceptional knowledge of environmental engineering and proficiency using spreadsheets.
- Result driven individual with the ability to manage projects and initiatives to completion and understanding of continuous process improvement and problem solving methodologies. Hopeful for an Industrial Engineering student position with American Express; bringing superior analytical skills and experience using IE software.
- Strong communicator adept at problem solving and quantitative analysis, with a solid industrial engineering background and exposure to project management, as well as advanced statistical analysis tools. Interested in an Engineering Student position at Kelvic Inc., to apply and improve on skills. “BTech in Mechanical Engineering from ABC University with 3months of internship at the XXX Inc. Looking for a position of an Automobile Engineer at a reputed company that will channelize my personal growth as well as help me effectively contribute to the company’s long term goals. Good analytical, comprehensive, problem-solving skills.”
- Problem solver with strong interpersonal abilities and background in procurement engineering. Seeking the Procurement Engineering Student position with Phillips Resources, to apply solid knowledge of procurement engineering issues and learn new skills.

- Applying for the Process Engineering Intern position with ABC Company where profound knowledge of process engineering, proven leadership abilities, and exceptional communication and interpersonal skills will be utilized.
- Engineering student with strong ability to apply basic engineering principles to solve technical problems, as well as communicate technical concepts in a clear manner. Seeking for an Engineering Student Intern position with LLNL, coming with strong computer and excellent communication skills.
- Talented individual with highly analytical mind, presentation and writing skills, and 3.0 GPA. Seeks an Engineering Student position with Canon inc. to apply knowledge from classroom in a professional work environment. Also, coming with good time management skills and technical knowledge.
- Engineering student with sound judgment and strong interpersonal skills. Desirous of an Engineering Student position to utilize technical knowledge and build on skills. Bringing experience with spreadsheet and strong research skills.
- Enthusiastic Civil Engineering student with excellent oral and written communication skills and sound technical background. Desirous of Structural Intern position with Walter P Moore.
- Mechanically inclined individual with effective communication and collaborative skills. Interested in a Mechanical Engineering Student position with Hedrickson. Bringing 3D modeling experience in ProE and 4.0 GPA.
- Strong communicator with demonstrated leadership abilities. Looking to obtain Engineering Student position with CBC, to apply knowledge from classroom in a professional environment. Bringing advance mathematical skills, technical knowledge, and data analysis skills.
- Computer engineering student with effective communication and collaborative skills and GPA 3.5, seeking for an Engineering Student position with Dellic Inc. to apply and improve on skills. Coming with strong technical knowledge, programming, and design skills.
- Looking for a chance in a company that helps me give my absolute best and enhance my abilities in the engineering field. I will do my best to meet the expectations of the company.

- To work with my technical abilities for the improvement of the organisation. I also aim to work extra hard to achieve my target and give the best performance in the organization. I am eager to utilize my innovative abilities, skills for the accomplishment of the projects.
- To secure a good position in a competitive and creative engineering environment that will benefit from my creative ideas, experience, and collegiate skills and will expectantly add value to organizational operations.
- A hardworking, dedicated, and goal-focused individual with a degree from XYZ University. I aim to be placed in a company where I can use my analytical and technical skills and comprehensive abilities to better the company and personal learning.
- My aim is to work as an engineer or a related position, which provides key participation, team-oriented tasks, healthy challenges, and career opportunities.
- My goal is to work as an electrical engineer in the construction industry. A fresher with a six-month internship with Infosys, and a license to work in Bangalore. I aim to provide my best and gain knowledge and skills while providing excellent services to the employer.
- This year, I graduated from the Indian Institute of Technology, Delhi, and am currently pursuing my master's degree at the same university. I aim to find an internship program at Microsoft that would contribute to my educational background and passion for engineering. Alongside, I would obtain first-hand experience at the company.
- My aim is to obtain a forensic mechanical engineer internship with an automotive company. Three months of experience with a New Delhi-based firm, followed by a three months internship under a forensic structural engineer.
- With a master's degree in physics. Willing to learn and gain experience in commercial and military aircraft, missiles, and spacecraft. I aim to find a full-time aeronautical engineer post and continue designing, developing, and manufacturing in industries such as supersonic jets, space shuttles, helicopters, and satellites.
- Looking for a position as an engineer in a company that enables state-of-the-art software and hardware components with an innovative, creative association in a working domain that promotes critical thinking, innovation, and proper career development.

- I am a process engineer seeking a technical position with a firm in the oil industry, which may avail my deep knowledge in project development and oil/gas exploration. Experience in EPCs and displayed potential in process simulation software
- 1 year of experience as a mechanical engineer. Detail oriented, dedicated, critical-thinker with excellent problem solving and comprehension skills. My objective is to find a position in the aerospace industry. Advanced material knowledge and experience in managing computer tools required to draft designs for helicopters, rockets, and planes.
- My objective is to find a position in Product Development at a manufacturing company. Experience in the pool and spa industry, strong background in electrochemistry, metal corrosion and water treatment, as well as knowledge in product development disciplines. Willing to relocate.
- With 3 years of experience as a junior chemical design engineer researching to develop new and better manufacturing processes. My purpose is to excel in alternative energy, biomedical, biotechnology, chemical products, chemical manufacture, and civil engineering while working for an efficient organisation.
- With more than 6 months of experience and internship as a petroleum engineer primarily developing plans to augur in the oil and gas field, and working on the ways to inject water and chemicals into oil gas. I am well-trained in evaluation of the production of well via surveys and analysis.
- I am looking for a junior mechanical engineer position with a company and/or an engineering firm that would enable me to avail my PE license and background in the analysis of robotics engineering, Agricultural engineering, and the topics related to Combustion and the Environment.
- A motivated individual with in-depth knowledge of languages and development tools, seeking a position in a growth-oriented company where I can use my skills to the advantage of the company while having the scope to develop my own skills.
- To work as a Software Engineer applying my knowledge in the field of testing, designing, and maintenance to cater to the specific needs of the people. I wish to work in a team of motivated individuals who wish to work towards the advancement of the company and its goals.

- Interested in the role of a Software Engineer where I can contribute my analytical skills and knowledge acquired by pursuing my **degree in Software Engineering**. Looking for a dynamic and progressive company where my skills are utilized in the maximum way possible.
- Looking for an entry-level position as a Software Engineer in a dynamic firm that values my analytical and technical skills and provides scope for updating my knowledge, I seek a company that will help me contribute to its development while concurrently aiding my personal growth.
- Seeking a job opportunity as a software engineer in (XYZ company), I am a driven individual with skills and expertise in the designing, planning, and maintenance of software programs, I wish to work with a diverse team that works towards contributing to the company's vision and goals.
- An individual with a keen interest in Software programs, possessing good interpersonal and analytical skills, who wish to use technical knowledge catering to the needs of the company. I wish to work with a diverse group of people and see myself heading a group of people over a 1-year duration in the company.
- Experience software engineer with a master's degree in Computer Science and Engineering, seeking a suitable job opportunity at ABC Inc. to utilize my excellent software design skills and customer service abilities.
- Detail-oriented individual with a BTech in Software Engineering, looking for a software developer position in a fast-growing company to utilize my technical skills and working knowledge of software applications, development and design.
- Looking for a suitable job role in Software Engineering and Development with ABC Inc. to utilize 2+ years of experience in technology engineering, software design, client support and servicing and server maintenance.
- Desirous for the role of Software Developer at TUV Inc. to design complex requirements of clients and customers into hi-tech and reliable software. Excellent knowledge of software design and development especially data structures and product-oriented designs and 3 years of work experience as a software developer.

- Interested in the job role of Software Engineer at STR Inc. where I can apply my technical skills in coding and software design to fulfil the clients' particular requirements and augment the reputation of the company.
- An exceptionally creative individual with a BSc in Computer Science and internship experience in software design. Seeking the role of Software Engineer at CDC Inc. to incorporate my extensive knowledge of software designing and development to meet the clients' specifications and gain professional experience alongside.
- Searching for a challenging position as a software engineer to utilise my tech and design skills for software program development, testing and quality management.
- A result-oriented individual with an M Tech in Software Engineering, seeking a suitable position at a reputed organisation where I can use my extensive knowledge in software design and development and further learn new things and grow as a Software Engineer.
- Analytical-minded and creative team player with a strong background in designing, planning, and maintenance of software programs, desirous of the role of Software Engineer at DC Inc. to hone my technical skills and expertise along with designing creative software and products as per the clients' needs and enhance the reputation of your organisation.
- B Tech Software Engineer graduate searching for a suitable role at Microsoft. Bringing exceptional creative and innovative designing expertise, excellent communication skills, troubleshooting skills as well as ability to develop object-oriented products as per customer requirements.
- Interested in advancing a career as a Software Engineer at BMU Inc. Offering experience in software design and development, knowledge of hardware and coding as well as integrating innovative software solutions as per clients' specifications.
- Creative-minded and detail-oriented individual with the ability to adhere to established procedures and thrive and learn on my own under little or no supervision. Seeking the role of a Software Engineer at YYY Inc. to incorporate my expertise in software design, application development and quality assurance.
- A curious learner and excellent team player searching for a challenging position as a Software Engineer at MIL Inc. to utilize my technical competencies, working knowledge

of software development, troubleshooting and networking services and excellent communication skills to grow as a Software Engineer.

- An innovative individual with a **BTech in Computer Science Engineering**, desirous to find the job position of a Software Engineer to apply my exceptional knowledge of design, development, coding and quality testing of software as per clients' requirements.
- A dedicated and result-oriented IT professional possessing a passion for programming and seeking a software engineering position with ABC International to make the most of my coding skills and leverage the goals and ambitions of the organization.
- Looking forward to earning the position of Software Engineer at a leading organization to showcase my skills in programming to generate high-end solutions to general software issues along with drawing better user experience.
-
